

# Santosh Thombare

Front-end Developer & UX/UI Designer at [Bysness Inc](#)

[sans.thombare@gmail.com](mailto:sans.thombare@gmail.com)

[behance.net/santosh-thombare](https://behance.net/santosh-thombare)

Mumbai, India

## Objective:

Looking to apply my 7+ years of UX/UI design & front-end development experience with the opportunity that allows me to enhance my growing skillset

## Highlights:

- Extensive experience in software technologies as a Front-end Developer and UX/UI Designer
- Involved in defining scope, evaluating effort estimation, setting milestones, and managing designers, and front-end developer team of the projects
- Involved and worked in the ideation process, research, and analysis of different product ideas while contributing as a Front-end Specialist
- Covering different prototypes and MVPs for business ideas, IoT devices, code generation platforms for web applications for different sectors
- Worked on various things consisting of researching, designing and developing web and mobile app projects for overseas projects, managed and trained creative team on research, user flows, prototyping, IA, etc., while driving each of the above projects and internal products

## Timeline of professional experience:

**Front-end Designer** **Bysness Inc, Mumbai** **(2016 – 2022)**

- Lead the designer and front-end engineering team to invent an internal product that mostly focuses on a human-centric design approach, led research in building UX/UI components based on actual user-behaviors
- Lead the front-end engineer team on a MarTech sector project where we drive effortlessly hand-over from another design agency and developed a complete web app with client consulting on user flows with the help of the latest tech trends
- Lead the RPM, TIFM, Jobchain, and Radiance project which has multiple portals with the mobile application, act as a Team lead on the Front-end side from UI/UX to fully interactive modules integration, designed and developed complete design process from the initial phase to completion phase
  - RPM (Remote Patient Mgmt. - Healthcare) – **Team size:- 3**
    - Defining the scope of the project, user research, user flows and developed planning for front-end delivery.
    - Designed wireframes, prototypes, IA with Hi-fi screens, also developed 24+ responsive web pages including reusable stateless components using HTML / SCSS / React. Designed a deck for the project to pitch hospitals
    - Also designed and developed front-end screens for mobile app using Flutter technology
  - TIFM (Total Infrastructure and Facilities Mgmt. – Facility Services)- **Team size:- 8**
    - Defining the scope of the ERP product, 13+ user research, user journeys and defined milestones, delivery planning and effort estimation for designer and front-end team
    - Designed wireframes, prototypes, IA documented each module as a technical guide for end-user
    - Developed responsive web pages including reusable stateless components using HTML / SCSS / React
    - Designed and developed front-end screens for supervisor mobile app using React Native technology
    - Also designed and developed Real-time analytical dashboard(Android Tv) for Chief officer / CEO / CFO,etc.
  - Jobchain (Import/ Export Shipment Tracking - Transport) – **Team size:- 5**
    - Defining the scope of the product, user research and designed prototypes, stylesheet guide
    - Developed responsive web pages for Jobchain application, which includes CRUD of jobs, tracking window, notifications, sorting based on shipment delivery, billing on site, and includes product website

**Front-end Engineer** **Kronosis Hyper Technologies, Mumbai** **(2015 – 2016)**

- PHP, JavaScript, MySQL technology are used here for building CRM & Investor management web application
- Vijay CRM (Client relationship management – Real Estate) - Developed multiple web screens like Add sites/projects, HR module, campaigns, billing, Kanban view, etc. Also, generate 23+ reports based on collected data across different sites

## Skills:

- Web Development / Web Application
- Mobile Front-end Development
- Web Designing
- UX/UI
- Prototyping
- User Flows / Storyboards
- Information Architecture (IA)

## Technologies:

- HTML / CSS
- SCSS / SASS
- JavaScript
- Git
- Databases (MySQL, MongoDB)

## Tools:

- Figma
- Adobe XD
- Miro
- Draw.io
- Git
- Sonar Cloud

## Education:

- Mumbai University, Mumbai  
Bachelors in Computer Engineering, (2013)
- MSBTE, Mumbai  
Diploma in Computer Engineering, (2010)

## Competencies:

- Front-end Leadership
- Tech Research and Development
- Tech Management
- Planning Tech & Milestone, Evaluate Effort Estimation
- Tech Demonstration

## Technology Served In:

- Marketing
- Healthcare
- Real Estate
- Transport
- Facility Services
